

Hands on Exercise --additional information is provided in the handout. Participants will develop a spatial green infrastructure plan that meets the Comprehensive Plan objectives using tools provided in the Planning Tool Box.

1. Identify critical green infrastructure resources
2. Indicate what planning tools can be applied where on the map. Each team should be prepared to describe what was saved, why and how.
3. What challenges are presented by the tools chosen? What else can be done to conserve Center County's resources?

Center County - Green Infrastructure Planning Base Map
